## About the ELBEGY covering

The DARUMI interior doors - are premium class doors at an affordable consumer price. We managed to achieve this perfect combination of price and quality thanks to:

1. More than 14 years of experience in woodworking;
2. Full-cycle production (this gives us the opportunity to produce high-quality products at a more affordable price);
3. Using the Japanese ELBEGY covering with its unique properties;
4. DARUMI is a brand representative of a large domestic holding for the production of interior doors, one of the priorities of which is to check the quality at every stage of production. This guarantees our partners a product of European quality.

We can say with confidence that even the most demanding customers will be completely satisfied with the unique properties of DARUMI doors.

The product has no analogues in terms of wear resistance parameters:

- The ELBEGY door covering protects them from possible scratches and abrasion during long-term use. Such properties will be appreciated by consumers who keep four-legged pets;
- Thanks to the technology of EBT - Electron Beam Technology, DARUMI doors resistant to mechanical damage. The printed layer is reliably protected by the top acrylic layer, which provides high strength.

Compliance with the European Union standard №1907/2006(REACH) allows you to easily install doors in apartments and houses with small children. The child will be completely safe due to the lack in composition of the covering:

- plasticizers with toxic properties;
- aggressive solvents;
- formaldehydes;
- volatile organic compounds.

The food industry prefer DARUMI because our doors have a formal permit to use them in these areas.

The covering has the following characteristics:

- not biodegradable;
- non-toxic;
- contact with food is allowed;
- there is no release of volatile substances.

Due to the close connection of the factory with warehouses, we deliver interior doors wholesale in the shortest possible time.

The main advantages of the covering created on the basis of environmentally safe polypropylene:

1. Compliance with existing international environmental standards.
2. DARUMI doors - is a high strength parameters in combination with aesthetic perfection.
3. Immunity to possible formation of spots.
4. Simple does not require much effort to care.
5. Durability in the most intensive use.
6. Light resistance in direct contact with sunlight.
7. Moisture, heat and chemical resistance.
8. Compliance with fire safety requirements.

**In the event of a fire, ELBEGY does not emit substances that are dangerous to humans or the environment. An important caveat - is that the flash point in terms of temperature is more than 300°C.**
